

ALCOSAN Service Area

Allegheny County

ALCOSAN Sewersheds, Outfalls, and Interceptors Located in the Conveyance and Treatment System

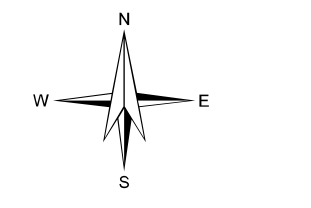

Allegheny County Sanitary Authority
Allegheny County, Pennsylvania
January 2021

CD Reference Appendix K Paragraph 3.a

There are occasions along the Interceptor System where a group of regulators have a consolidated outfall going by the name listed in the Consent Decree. Their labels have been noted with an asterisk. Overflow pipes from ALCOSAN structures C-24 and C-25 consolidate at outfall C-24. Overflow pipes from M-191, M-191 and M-191* consolidate to form outfall M-19A. Overflow pipes from ALCOSAN structures M-04A, M-04B and M-04D consolidate to form outfall M-04Z. Overflow pipes from ALCOSAN structures Q-16 and Q-16Z consolidate at outfall Q-16.
**Data used to show Sewershed by Type is the latest available information from the Basin Planners. This data reflects information that was developed for the Basin Hydrologic and Hydraulic Models and is subject to revision.
